

SmartSoft's

Products and Services Catalog

SmartSoft offers NEXTSTEP systems engineering, mission critical development, and object oriented consulting services in addition to the development of our shrinkwrap product line. For more information on our products or services, please call us at 809/565-2864. You may also communicate with us by sending email to: Info@SmartSoft.COM

StayInTouch is a sophisticated electronic address book providing powerful features to help you increase your productivity in all your communication tasks. It helps you manage mailing addresses, email addresses, phone and fax numbers and correspondence; the information you need to stay in touch.

InForms is an useful application for filling out single page forms such as transmittals, memos, or any other office form used in the office environment. InForms is the alternative to diving into a word processor or some other heavy duty application to fill out a simple one page form.

NIST Synchronicity is a Preferences.app module that will set your NEXTSTEP system clock to the nation's official time by making a call to the National Institute of Standards and Technology's cesium clocks in Boulder, Colorado. Synchronicity will slowly speed up or slow down the computer's time until it matches the correct time.

CollagistPro is an electronic glue board that allows you to combine multiple documents of different types into a PostScript file that you can fax, print or email with ease. CollagistPro sports a powerful API that allows you to incorporate its functionality into your own mission critical applications.

CollagistPro supports all standard NEXTSTEP file types, or any type that filter into one of the standard file formats via a filter service.

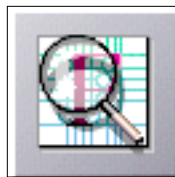

This product replaces our original Collagist.app, it offers many new enhancements, including full layout control over each document.

DiskMaker is the fastest disk duplication software for NEXTSTEP. With it you can duplicate disks up to 9 times faster than is possible by hand. It's powerful verification technology insures that your copies match the original bit by bit.

Rocks! is the mother of all space games. Your mission is to clear bothersome asteroids to enable warp travel through the sector. Beware of natural and not-so-natural phenomena. Space is dangerous, specially when on the fringe. Excellent graphics. Restful hours at the computer will never be the same!

FONTinspector is a Workspace Manager contents inspector for font files (.font). This inspector allows you to preview a font even before it is installed in the system.

DotFiles is a small applet that allows you to toggle the visibility of hidden files in your Workspace.
